Assignment: assess an online exam

경성대학교 KYUNGSUNG UNIVERSITY

Fictional exercise • Exam in 30 days
A public exam system has an unfixed software flaw.
A backup exists, but nobody has tested restoring it.

1. Name the four asset types.
2. Explain a possible harmful event.
3. Rate likelihood and impact.
4. Choose and explain a control.

1. Information, services, devices, people
2. System gets hacked and the untested backup fails, wiping out the exam entirely.
3. Likelihood is high and impact is high.
4. Patch the flaw and test the backup restore.

Report your reasoning in four sentences

경성대학교
KYUNGSUNG UNIVERSITY

Use the terms, then explain them in plain English.

1. “The asset is …; it matters because …”
2. “The threat could use …, which is the weakness.”
3. “Likelihood is … and impact is … because …”
4. “Our control is …; it reduces …”

1. The asset is the public exam system and its data; it matters because losing them would cancel the exam and damage institutional trust.
2. The threat could use the unfixed software flaw, which is the weakness.
3. Likelihood is high and impact is critical because the flaw is already exposed online
4. Our control is patching the flaw and testing the backup restore; it reduces both the chance of an attack and the risk of permanent data loss.
